

Content Health Dashboard for AEM

Monitor your AEM content health with Vation's Content Health Dashboard.

What is Vation's Content Health Dashboard accelerator?

Vation's Content Health Dashboard is an AEM vitals accelerator that enables users to monitor, govern and ensure the quality of their AEM content and digital assets in real-time.

Vation's AEM Content Health Dashboard provides a unified, author-accessible dashboard for a comprehensive health overview of selected Sites and DAM structures. This Plug & Play Component instantly identifies, centralizes, and surfaces all major content issues in one interface.

Benefits & functionalities

Accelerated Deployment and Time-to-Value

The dashboard is delivered as an easy-to-install AEM package and functions as a Plug & Play Component, allowing teams to instantly embed and get up and running with minimal effort and complex setup.

Proactive, Targeted Content Governance

It enables proactive governance by auto-detecting broken links, duplicates, and metadata gaps directly in the authoring environment, ensuring SEO and asset hygiene is addressed before issues impact the frontend.

Personalized and Relevant User Experience

The component offers Tailored Scope Control that allows authors to define specific paths to monitor, ensuring Personalized Insights Delivery that evolves with user needs and focuses only on the content that matters most.
